

Bloodborne Pathogen Training Program

This training program is designed to increase the participant's knowledge in the area of bloodborne pathogens according to the Occupational Safety and Health Administration, [CFR 29 section 1910.1030 of the OSHA CFR 20 Standard](#).

Level I Employees as designated in the Stetson University Bloodborne Pathogen Exposure Control Plan are employees with a higher risk exposure and who, by nature of their jobs, would be expected to come into contact with blood or bodily fluids on a frequent or regular basis. Employees in Level I are offered pre-exposure Hepatitis B vaccinations and have the right to decline. The following areas and roles are considered Level I employees:

- Facilities Management (Maintenance Technicians, HVAC Technicians, Pest Control, Plumbing, Custodial Services)
- Faculty and lab personnel with occupational exposure to human blood or other potentially infectious human materials
- Public Safety
- Sports Medicine
- Stetson Health Services

Level II Employees as designated in the Stetson University Bloodborne Pathogen Exposure Control Plan are those employees with a moderate risk exposure and who may have a reasonably anticipated exposure but not on a regular or frequent basis, or whose functions act as backup or secondary to those listed above. Level II Employees will be given post-exposure evaluation and follow-up with a physician in the event of any occupational exposure to blood/bodily fluids containing blood. Level II employees are:

- Athletic coaches
- Lifeguards
- Residential Life (Including Resident Assistants)
- Wellness & Recreation staff

If you have a bloodborne pathogen exposure incident:

1. **Immediately wash the exposed skin area with soap and warm water (or mouthwash if contact in mouth). Flush eyes with water.**
2. **Advise your supervisor immediately.**
3. **Report exposure within 24 hours to the Office of Risk Management.**
4. **Post-exposure medical evaluation, prophylaxis (which may include Hepatitis B vaccination) and follow up will be provided to all employees who have had an exposure incident at no cost to the employee. Be sure to return for all appointments and follow-up visits.**

Training Requirements:

1. **Complete the online training module titled "Bloodborne Pathogens: Protecting Yourself on Campus". This module is available at https://learn.ue.org/stetsonuniversity/learn/lp/75/bloodborne-pathogen-training?generated_by=17899&hash=4a4286f4a129e01fe1cf8ab2c425f04a2cd637d6. Users need to use their Stetson login to access the course.**
2. **Review the Bloodborne Pathogen Exposure Plan available on the Risk Management website.**
3. **Complete and score 80% or higher on the Bloodborne Pathogen Training Quiz included in this packet.**

Bloodborne Pathogen Training Quiz

Employee Name: _____ 800#: _____ Date: _____

Please complete the following quiz by using the checkbox next to the most correct answer and writing your answers in the text-free field:

1. True or False: Bloodborne pathogens are microorganisms that are present in human blood and can cause disease in humans.
 True
 False
2. True or False: Universal Precautions advise you to assume all blood is infectious.
 True
 False
3. True or False: According to OSHA (Occupational Safety and Health Administration), vomit, mucus, urine, and feces are not sources of blood borne pathogens' exposure unless there is visible blood in them.
 True
 False
4. True or False: The four phases of an event are spill, scene control, spill source management, and clean up.
 True
 False
5. What are the big three viruses mentioned in the video? *Select all that apply.*
 COVID-19
 Hepatitis A
 Hepatitis B
 Hepatitis C
 Human Immunodeficiency virus (HIV)
6. What Personal Protective Equipment (PPE) is available to you, free of charge, for bloodborne pathogen clean ups? _____
7. What supplies do you need to clean up bodily fluids?
 Gloves
 Paper towels
 Disinfectants (bleach or ammonia)
 All of the above
8. For how long should you wash your hands?
 0 to 10 seconds
 20 to 30 seconds

- 1 minute or more

9. Which of the following are the steps you need to follow after a bloodborne pathogen exposure:

- Wash the exposed skin area with soap and water
- Notify supervisor
- Report exposure to the Office of Risk Management within 24 hours
- All of the Above

10. Where can you find the Stetson University's Exposure Control Plan? *Select all that apply.*

- University Policies & Procedures link in My Stetson
- Risk Management Website

Bloodborne Pathogen Training Acknowledgement

Please initial each item indicating your full understanding and agreement to each point.

_____ I listened, watched, and understood the required Bloodborne Pathogen training video.

Date of Completion: _____

_____ I understand that my position or role may have an increased risk of exposure to bloodborne pathogens.

Please list the identified Exposure Level for your position or role: _____

_____ I understand that the **Level I** employees are offered Hepatitis B vaccinations by the University and that **Level I** employees can contact the Office of Risk Management at any time to request a vaccination.

_____ I understand that if I have a bloodborne pathogen exposure incident, I must immediately wash the exposed skin area with soap and warm water (or mouthwash if contact in mouth). If eyes were exposed, I must flush my eyes with water.

_____ I understand that I must notify my supervisor immediately if I experience a bloodborne pathogen exposure.

_____ I understand that bloodborne pathogen exposures must be reported within 24 hours to the Office of Risk Management and will be submitted as a workers' compensation claim if I am a University employee.

By signing below, I certify that I have received training on the policies and topics listed above. I certify that I fully understand the duties, responsibilities, roles and expectations of me as it related to these policies and topics. I agree to abide by and follow all University policies and procedures related to this topic.
